Project Pattern Issue #58

Beveled 3-D Star

Materials

- 1 square foot of glass
- 8 diamond bevels (1 3/4" x 3")

Cut, foil and solder two of each pattern on this page. This will give you four small finished "panels" to assemble into the final 3-dimensional star.

Once you have your four "panels" assembled, solder them together along the center seam at right angles. Solder a wire hanger into the center seam at the top.
